Add a place: an AI check is the gate, people nearby confirm

Every shared place passes the same server checks, then Claude Haiku 5.5. The answer shows on the same screen in about 2 seconds. How much trust a "yes" gets depends on the contributor's tier. New users get the strictest gate.

What the AI answer means, by contributor tier

Contributor	AI: publish	… then people nearby	AI: hold	AI: reject
New account < 7 days, or < 3 places accepted	Live only if confidence is high; medium → hold	1 confirmation from a different attested phone	Moderator, 24 h	Not accepted + appeal. 3 in 24 h → adding paused 24 h
Baharu everyone else	Live, "Not verified yet"	1 confirmation (launch mode; 3 later)	Moderator, 24 h	Not accepted + appeal
Perak ≥ 10 accepted, ≥ 90% accurate	Live, "Not verified yet"	1 confirmation	Moderator, 24 h	Not accepted + appeal
Emas ≥ 50 accepted, ≥ 95%, 90 days	Live and verified, Emas badge; 10% audited	Audit only	Moderator, 24 h	Becomes hold: never an automatic reject

The gate, precisely

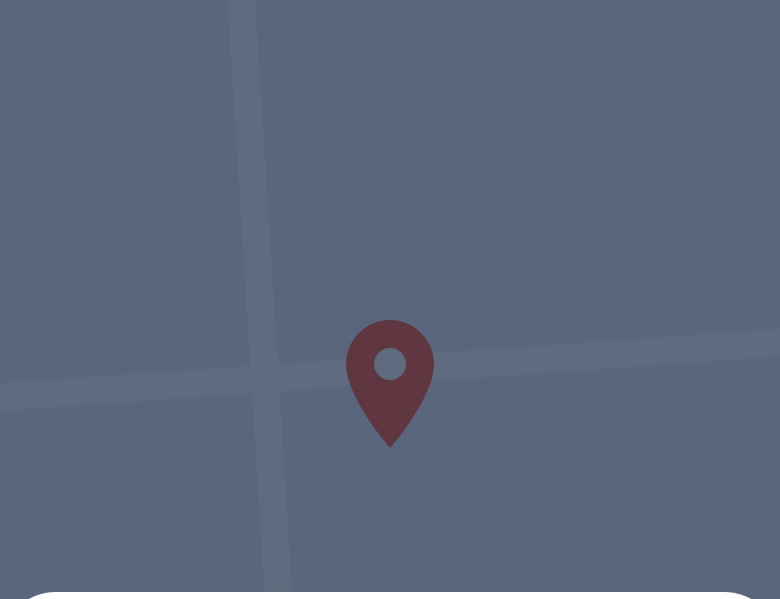

- Called inside POST /places with a 4 s budget; slower → saved as "Being checked" and finished by the worker (B6)
- AI down for an hour → the place goes to the moderator queue; nothing is lost
- Reasons are fixed codes (spam, scam, private_home, adult, illegal, security, duplicate, gibberish) mapped to plain copy; the AI's free text is never shown to users
- Built: slow or failed checks are retried by the worker every minute; spend is capped at US$20 a week (ledger per Malaysia week), then places fall back to plain vetting. Batch API (half price) only if volume ever makes it worth it

Anti-spam for new users

- Stricter confidence bar while new (table above)
- 3 AI rejections in 24 h → adding paused for 24 h (B5 copy), automatically lifted
- An AI rejection counts toward the 7-day suspension only when a moderator upholds it
- Appeal: one per place, a note of up to 200 characters, a person answers within 24 h

Privacy stays as promised

- The AI never receives the user id, pseudonym, device or GPS track, only what the contributor publishes
- "Just for me" never leaves the phone, and B4 offers it as the safe option for homes
- AI verdicts are stored as code + confidence on the place; the request body is not logged
- Anthropic listed as a processor of public submissions in docs/supply-chain.md and the privacy policy

YOUR FIRST SHARED PLACE

How adding a place works

Everyone can see it

Shared places appear on the map for all drivers, under your pseudonym.

A quick automatic check

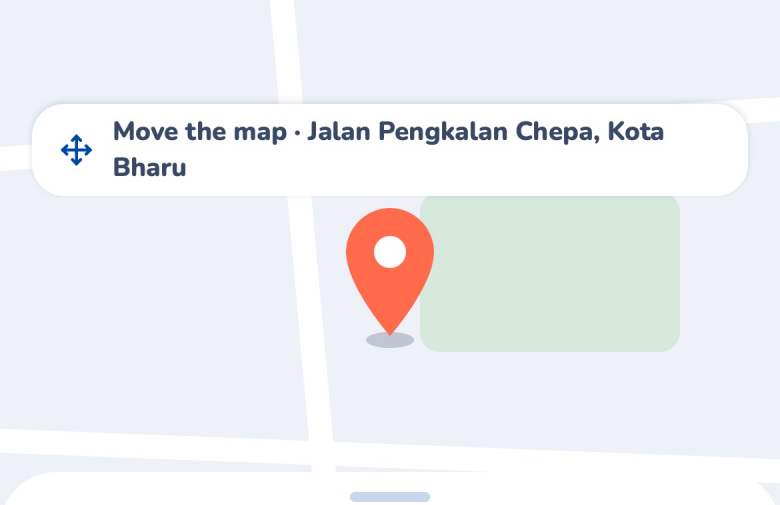

Takes about 2 seconds. It looks only at what you write, never at who you are.

People nearby confirm it

Until then it shows "Not verified yet". Accurate places raise your level.

Shops, stalls, surau, workshops, parking and places to stop. No homes, adverts or job offers. Want it only for yourself? Choose "Just for me": it never leaves your phone.

Added by an Emas contributor

Your Emas level means it skips the wait. It still passed the same automatic check. Now and then we ask a driver nearby to confirm an Emas place, to keep everyone's level fair.

Done

If the automatic check is unsure about an Emas place, a person decides. It is never refused automatically.

No, mine is a different place

"Different place" sends it on with that answer. If the check still thinks it's the same, a person decides (B2). Nothing is lost either way.

A person will check this one

Parkir IPD Dang Wangi

Being checked · usually within 24 h

Why: the description mentions security details (cameras, guard times). We never publish those, but the place itself may be fine. A maintainer may remove that sentence and publish the rest.

Until then only you can see it. You'll get the answer in your Inbox.

Edit description

OK

New contributors see this more often: until you have 3 accepted places, anything the check isn't sure about goes to a person.

This looks like an advert, not a place

Rumah Mak Teh

Other · Taman Sri Muda, Shah Alam

To protect people's privacy, we don't publish private homes for everyone. You can still keep it on the map for yourself. A "Just for me" place stays on this phone and in your own backup, and never reaches Manotu.

Sent. We're still checking

Gerai Nasi Kerabu Mek Na is safely with us. It will go on the map as soon as the check finishes, usually within a few minutes. You'll get a message in your Inbox.

NO CONNECTION

Saved on this phone. It will be sent and checked when you're back online. It stays on your map meanwhile, shown only to you.

OK

If the check service is down for more than an hour, a person reviews the place instead. Nothing is lost.

What should the reviewer know?

Mak Teh sells kuih from her house every morning, there's a signboard and a table outside.

93 / 200

A Manotu maintainer, a person, answers within 24 hours. One review per place. Don't include phone numbers or names of people here.

Tip: renaming it "Kuih Mak Teh" and adding opening hours often passes the check straight away.
